

The cloud telephone system from toplink

With the virtual Private Branch Exchange (vPBX), you can network all departments and locations of your company with just one telephone system. It offers you a comprehensive range of services of over 160 functions, including Instant Messaging and Presence Information.

Cost saving - this is how it works:

- No more telephone systems on-site
- Regular maintenance and updates by toplink are already included in the basic fee
- No additional costs
- Flexible and scalable at any time
